Archiving Appliance

EMAIL ARCHIVING IN A BOX

Introducing ComplianceVault™

Email archiving appliance powered
by Intradyn Technology

Available in 320, 500, 800GB, and
1TB disk capacity options

IMATION™ ComplianceVault™ Archiving Appliance

The Imation ComplianceVault Archiving Appliance is a completely integrated all-in-one hardware/software email archiving appliance. It indexes and archives all of a company's email from Microsoft Exchange, Lotus Notes or virtually any IMAP/POP3-based email system on a continuous basis, from a virtually unlimited number of mailboxes. A simple but powerful user interface allows for extensive search and audit capabilities.

Unlike other solutions requiring ongoing per-user license fees and software maintenance costs, the Imation ComplianceVault solution features a low, one-time investment. It offers the hard disk drive capacity ranges, tape format choices, and price points that perfectly fit the needs of small and midsize businesses - whether you're looking for an email archiving solution for regulatory compliance, legal discovery (e-discovery), or simply good business practices.

The unique Imation solution includes:

Intel server platform with embedded Intradyn ComplianceVault software with a choice of hard disk drive capacities (320GB, 500GB, 800GB, or 1TB capacity options) combined with multiple tape autoloader options from Exabyte (VXA-2, VXA-320, LTO-2, or LTO-3).

Email Archiving Is Necessary Today

Email messages are not just conversations—they're business records, which must be managed accordingly. As a result, email archiving is being rapidly adopted today in organizations of all sizes for:

- Regulatory compliance
- Legal discovery (e-discovery)
- Good business practices

Compatible with VXA-2, VXA 320,
LTO Ultrium™ 2 or LTO Ultrium™ 3
(WORM capable) tape autoloader

Most small to midsize firms have not yet been able to comply with regulations for email retention, whether in SEC-regulated environments or otherwise. The reason is two-fold: complexity and high cost. Previous solutions for email archiving, designed for large enterprises, are difficult for small firms to implement because they require specialized IT expertise, and go well beyond modest IT budgets.

Meeting Compliance Needs

The device allows companies to meet a variety of email retention needs whether related to regulatory compliance (SEC 17a-4, NASD 3110, FDA 21 CFR Part 11, HIPAA, etc.), or simply for good business practice in electronic records management. The ComplianceVault Appliance also allows for rapid searching of email to improve responsiveness to litigation discovery requests.

Imation™ ComplianceVault™ Solution Features

Archive, search, retrieve, audit, and encrypt

- **Easy to install, easy to operate**—sets up in minutes, and doesn't affect a company's existing IT infrastructure.
- **Complete Solution**—includes 1U server platform, hard disk drives, tape autoloader, application software, graphical user interface, Ethernet 10/100/1000 networking, 110/220 volt AC power, rackmount rail kits, cables, and technical support. No additional per-user costs, license costs, software maintenance costs, or other ongoing costs (other than removable media for the tape autoloader).
- **Unique Capability**—comes with customer's choice of Exabyte VXA-2, VXA-320, Ultrium™ LTO-2, or Ultrium™ LTO-3 tape autoloaders - based on award-winning and widely adopted technologies. WORM capability is available with the Ultrium™ LTO-3 solution option, for regulatory compliance requiring write-once, read-many (non-alterable) media.
- **Easy-to-use interface**—featuring simple navigation, clean design, and drop-down menus. The administrator can access the device from anywhere within the corporate network through a browser with a GUI interface. The device can also be accessed over the internet if configured as such.
- **Robust search capabilities**—including wildcard searches, fuzzy searches, proximity searches, and range searches to boost relevance levels, also with the ability to save searches.
- **Efficient**—email attachment management ensures no duplicates, since the system retains only one original.
- **Exporting of search results**—the ability to easily export any email search results directly from the search results screen to a file, to a CD, to an email, or to a printed hardcopy. This feature greatly facilitates use of the system for response to regulatory auditors, for legal discovery, or for review by a company's legal counsel.
- **Extensive audit features**—for better audit reporting and control. Every single access to the system is tracked by date, time, and user, providing a full audit log.
- **Encryption**—the appliance provides the option of tape encryption, to safeguard tapes from data theft or loss. EncryptTape™ technology is based on the same type of encryption used by the U.S. Federal Government, the highest level available, which is AES 256-bit—called "strong encryption".

Unique software compatibility with VXA or LTO tape autoloaders

Email archiving in a box

HOURLY, STARTING UNDER \$10,000!

The Freedom to Innovate

Compatibility

The ComplianceVault solution is compatible with Microsoft Exchange, Lotus Notes, or virtually any IMAP or POP3 email system other than Novell Groupwise. When attached to your network, all emails are immediately and continuously saved and indexed to disk, plus archived and indexed to tape at intervals you specify—making them available for retrieval in a manner compliant with corporate policies and industry regulations.

	ComplianceVault™ Archiving Appliance	VXA Autoloader	LTO Autoloader
Dimensions	16.9"W x 1.7"H x 23"D 42.93 x 4.3 x 58.4 centimeters	1.72 x 17.6 x 27.0 inches 4.36 x 44.8 x 68.6 centimeters	3.5 x 17.6 x 28 inches 8.8 x 44.6 x 71.2 centimeters
